

## LMA562 Wiring Guide

The LMA562 alternator has different pin outs compared to the original Paris Rhone units it replaces. Below you can see how our unit differs from the original

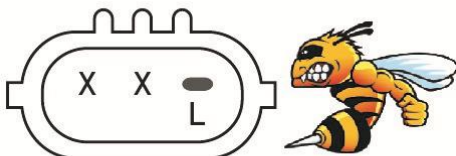

Original Paris Rhone alternators had the following:

- M6 B+ stud (battery positive / charge cable).
- L – Lamp terminal
- EX – Field terminal (ignition)

The LMA562 has 2 x active pins:

- M6 B+ stud terminal (battery positive / charge cable).
- L pin – Lamp terminal (use connector plug supplied).
